EXPERIENCE

AppGuard, Inc. A Blue Planet-Works Company
Advanced Sr. QA Engineer

Chantilly VA, USA
02/2018 – Current

Responsible for Quality Assurance team efforts from early product development phases to GA releases. Responsible for test planning, test design, test execution and measurements. Write test cases, use cases, user stories, traceability matrices. Perform hands-on testing for cybersecurity product Web based control panel application and Windows based client. Maintain web automation framework based on Selenium, Java, TestNG and Cucumber. Developed a Pester based testing framework for Windows client automation using PowerShell. Write performance/load testing scripts. Work closely with developers on discovered issues. Provide testing, troubleshooting and research for customers issues. Make sure bugs are getting fixed. Provide mentoring to the team. Developed from scratch a prototype pipeline for end-to-end testing using Azure DevOps and self-hosted Azure agents. Performed R&D for Windows Server based product, researched product behavior on multiple Server platforms, this effort led to successful POC. The product is now successfully released to the general audience and installed on thousands of Servers all over the world.

Comscore, Inc.
QA Engineer II

Reston VA, USA
06/2016 – 02/2018

Tested products using different platforms Web, Windows, Mac OS and Linux. Wrote test cases, test scenarios, test plans. Performed regression testing, positive and negative testing, usability and localization testing, bug fix testing. Demonstrated highest attention to details which helped find multiple important bugs. Carried out full issue workflows from initial report to closure. Consulted team members on product specifications and testing specific. Conducted deployments to production for releases and patches. Developed automation scripts for test build environment setup and build installation on Windows and Mac using Python, PowerShell, Bash and CMD. Established, optimized, and kept updated a set of VM images for Windows and Mac OS. Participated in R&D for new projects with no initial information available.
